

Titles and Organizers of Symposium Proposals Submitted for the Vth IWMC

(as of January 12, 2015;
subject to finalization by the Program Committee)

A World of Opportunities and Challenges: Graduate Students Seeking International Collaboration and Education in Wildlife Ecology and Conservation

Melissa Merrick, Jonathan Derbridge, Hsiang Ling Chen

Biodiversity Conservation Using Blakiston's Fish Owl and Red-crowned Crane as Umbrella species

Futoshi Nakamura

Brown Bear Monitoring and Management in Human Biosphere

Tsutomu Mano, Laurence Van Daele, Hifumi Tsuruga, Charles Schwartz

Colonization History of Commensal Small Mammals (House Shrews, House Mice and Black Rats) and Human Impact on Their Distribution Expansion

Sen-ichi Oda, Satoshi D. Ohdachi

Consecutive Monitoring of Japanese Black and Brown Bear Population Trends: Practicable Methods and Implementation Systems

Shinsuke Koike, Yoshikazu Sato, Koji Yamazaki

Conservation of Large Mammals in the Russian Far East

Leonid Baskin, Viatcheslav Rozhnov

Conservation and Management of Endangered Birds (Blakiston's Fish-owl, Red-crowned Cranes, White-tailed Sea Eagle) in Hokkaido

Akio Kudo

Conservation and Management of Wild Pigs (*Sus scrofa*) in Asia and North America

Mark D. Smith, Michael T. Mengak

Conservation GIS for Multisectorial Collaboration

Masami Kaneko

Conservation of Amphibians and Reptiles Considering Linkage between Terrestrial and Aquatic Ecosystems

Noriko Iwai

Considering the Problems of Capture and Mistake Capture for Management of Bears

Zhao-Wen Jiang, Yukiko Nanba, Aya Mizoi

Deer and Forest Management

Junco Nagata, Toru Koizumi

Disease Ecology

Junpei Kimura, Toshio Tsubota

Ecology and Conservation of Tibetan Antelopes

Hiromasa Igota

Endangered Owl Species Conservation in the USA and Japan: Contrasts and Strategies

Yuko Hayashi, Mitsuhiko A. Takahashi

Eradication of Alien Rats for Recovery of Seabirds

Takuma Hashimoto, Yutaka Watanuki

Evaluations of Multidiscipline Group of Wildlife Professionals in Wildlife Conservation and Management of Borneo

Masami Kaneko, Gen Bando

Evolutionary Aspects of Genetic Diversity of Asian Murine Rodents in the Genomic Era

Hitoshi Suzuki, Toshihiko Shiroishi

Exotic Macaques in Japan: Current Situation and Management Goals

Yuji Takenoshita, Kei Shirai, Yoshi Kawamoto, Shoji Kawamura

Feral Cat Issues on Island Ecosystems

Kazumi Shionosaki

For Better Conservation of Wild Ungulates and Utilization of Gobi-steppe Ecosystem of Mongolia

Takehiko Ito, Seiki Takatsuki

Genetics on Isolated Populations

Ryuichi Masuda

Governance and Science in Invasive Species Management

Fumio Yamada, Takuma Hashimoto, Koichi Goka, Tohru Ikeda, Masato Morikawa,

How to Manage and Control the Zoonotic Diseases in Wildlife?

Jiro Arikawa, Satoru Arai

Hunting as a Tool for Wildlife Conservation

Darren Miller

Index Design for Managing Sika Deer Scientifically by Considering Vegetation Biodiversity

Zhao-Wen Jiang, Yukiko Nanba, Aya Mizoi

Integrated Approach for Resolving Human-Macaque Conflicts in Depopulating Society

Katsuya Suzuki, Hiroto Enari

International and Collaborative Approaches to Lagomorph Conservation in a Changing World

Clayton K. Nielsen

Invasive *Callosciurus* Squirrels: from Asia to the World

Tatsuo Oshida, John Koprowski

Invasive Snakes: Different Species; Different Places; Similar Effects

Harold Balbach

Managing Competing Values of Beavers (*Castor* spp.) Despite Uncertainty

Jimmy D. Taylor

Marine Mammal Managements: Methodologies and Case Studies by their Application in Some Pinniped and Cetacean Populations

Hidehiro Kato, Mari Kobayashi, Kaoru Hattori, Toshihide Kitakado, Yu, Kanaji, Noriyuki Ohtaishi

Population Models in Wildlife Management

Hiroyuki Matsuda

Radiation Monitoring and Conservation of Wildlife after Fukushima

Shoji Kawamura

Recommendation from the Private Enterprises – Ecological and Economical Feasibility Study of Fencing Techniques in Deer Management

Seiji Kondo, Yutaka Ishizawa

Research and Conservation of the Cuban Solenodon, *Solenodon cubanus*: Challenges and Opportunities

Lazaro M. Echenique-Diaz, Satoshi D. Ohdachi

Road Ecology in Asia: Current State of the Science of Impacts and Mitigation

Hsiang Ling Chen, Rodney van der Ree, Yushin Asari

Seeking for Future Strategy to Control Ungulate Populations in East Asia

Masatsugu Suzuki, Hiromasa Igota, Mayumi Ueno, Ryota Araki

Spatial Population Structure as a Management Unit

Takashi Saitoh

Species Diversity of Mammals and Birds in Asian Countries

Hideki Endo, Masaharu Motokawa,

Strategy and Tactics for Deer Management in Wetlands

Yoshihiro Inatomi, Takafumi Hino,

Struggles for Effective and Sustaining Management of Invasive Alien Species

Tohru Ikeda, Makoto Asano, Steve Kendrott

The Advanced Approaches for Eradication of Invasive Alien Species

Makoto Asano, Takamichi Joghara

The Problems and Measures of Invasive Amphibians and Reptiles

Mitsuhiko Toda

The Role of Human Dimensions Research in Wildlife Management

Craig A. Miller, Ryo Sakurai

Towards Sustainable, Evidence-based Cormorant Management: Combining Knowledge and Experiences from North America, Europe, and Japan

Kayoko O. Kameda, Daniel D. Roby, Jun-ichi Tsuboi

Un-visual Observation of Marine Mammals Using Innovative Technology

Kaoru Hattori, Mari Kobayashi, Tadamichi Morisaka

What's a Role of Ex-situ Conservation by Zoos and Aquariums? - They Can Connect People and Nature

Daisuke Fukui

Wildlife and Traffic: Infra-Eco Network and Road Safety

Fumihiro Hara, Misako Noro

Wildlife Conservation and Management in Shiretoko National Park, 2015 - Sharing Experience and Knowledge with Yellowstone, Sikhote-Alin and Shiretoko -

Hiroyuki Uno, Takahiro Murakami, Charles C. Schwartz

Wildlife Management and Local Community in Third World: The Approach from Social Science

Akito Yasuda

Wind Energy and Bats -Toward Appropriate Assessment and Monitoring-

Dai Fukui, Kuniko Kawai
